WORKBOOK INSTRUCTIONS

1. This Workbook is an essential part of your Portfolio of Evidence, during the programme you will be required to complete these activities during or after class hours.
2. This Workbook Counts 10% towards your final summative assessment mark. You therefor need to ensure that you do not abuse, lose it or allow your fellow students to copy from it.
3. If you lose this workbook, you will be required to start writing in new one at your own time.
4. Neatness if of critical importance to ensure the assessor and can read and understand what you write.
5. Most workbook activities will take the form of group discussions during class.
6. You may not use a pencil to fill in temporary answers and erase it to completed later with a black pen.
7. You may only use a black pen to complete these activities.
8. Thie purpose of this workbook is to measure your learning progress, being dishonest will only be to your disadvantage and create a situation where the lecturer is unable to measure your progress and determine learning areas in which you might need further assistance or guidance.
9. This workbook must be submitted at the end of each phase as part of your portfolio of evidence.

ASSESSMENT CRITERIA ACTIVITIES

KM-01-KT01 — Safety, health, environment, risk and quality principles in the workplace

Workbook Activity 1

Subject Code: KM-01-KT01	**Safety, health, environment, risk and quality principles in the workplace**
Subject Topic: KT0201	**Legislation and regulations for workplace safety within electricity**
Workbook Activity 1	**Marks Possible: 4**

TASK	Time to Prepare	20 Min	Present time	5 Min
In your groups: Describe and explain the application of legislation for working with electrical installations, equipment and appliances | Various types of personal protective equipment are identified and their uses are explained | Describe and explain the difference between acts and regulations, the responsibilities of the various role players and the application of the relevant health and safety regulations in the workplace. | Safety signs are identified and described in terms of associated risk and safe conduct | The inter-relationship between workplace safety and a productive work environment is explained | The types of hazardous waste is identified and the impact of incorrectly disposing of waste is described. | Environmental regulations for the disposal of relevant hazardous waste is described | Regulations for the prevention and control of fires and the causes, effect and implication of fires are described | The attributes, characteristics, descriptions and properties of different types of fires are explained. | Basic first aid procedures are described for the attributes, characteristics and properties of various injuries. | The implication of injuries, their causes and effects are explained. | Basic risk assessment and hazard identification procedures are described (Weight 100%)				
Write your group's decisions within the space provided below, not more than 4 facts. Use a black pen only; no pencils are allowed. You have 15 minutes for preparation and 5 minutes for presentation. Appoint a speaker for your group and present your findings to the rest of the class. You may make use of the whiteboard or the A3 flip charts.
