ETD Artificial Intelligence Learning Design System

QCTO
Quality Council for Trades & Occupations

SAQA
SOUTH AFRICAN QUALIFICATIONS AUTHORITY

Honourable Minister, colleagues and partners. Today we unveil a new era in vocational education.

TODAY WE ENTER A NEW ERA OF EDUCATION

- ***Honourable Minister***, *today we present a system that embodies the new RSA AI Strategy — inclusive, ethical, locally sovereign, and transformative for education.*
- *The ETD* Artificial Intelligence *Learning Design System is South Africa's proof that AI can deliver accredited learning material in minutes, not months."*
- Distinguished colleagues, and partners — today we unveil a South African innovation that transforms vocational education.
- The ETD Artificial Intelligence Learning Design System is not simply software; it is a revolution in accredited learning design.
- It takes what once demanded months of preparation and delivers it in minutes, with integrity, compliance, and vision.
- This is education reimagined — **built here**, **with no sponsors nor funding**, for our people, and ready for the world." Just pure South African grit!

THE SOLUTION

Our solution is simple yet profound.

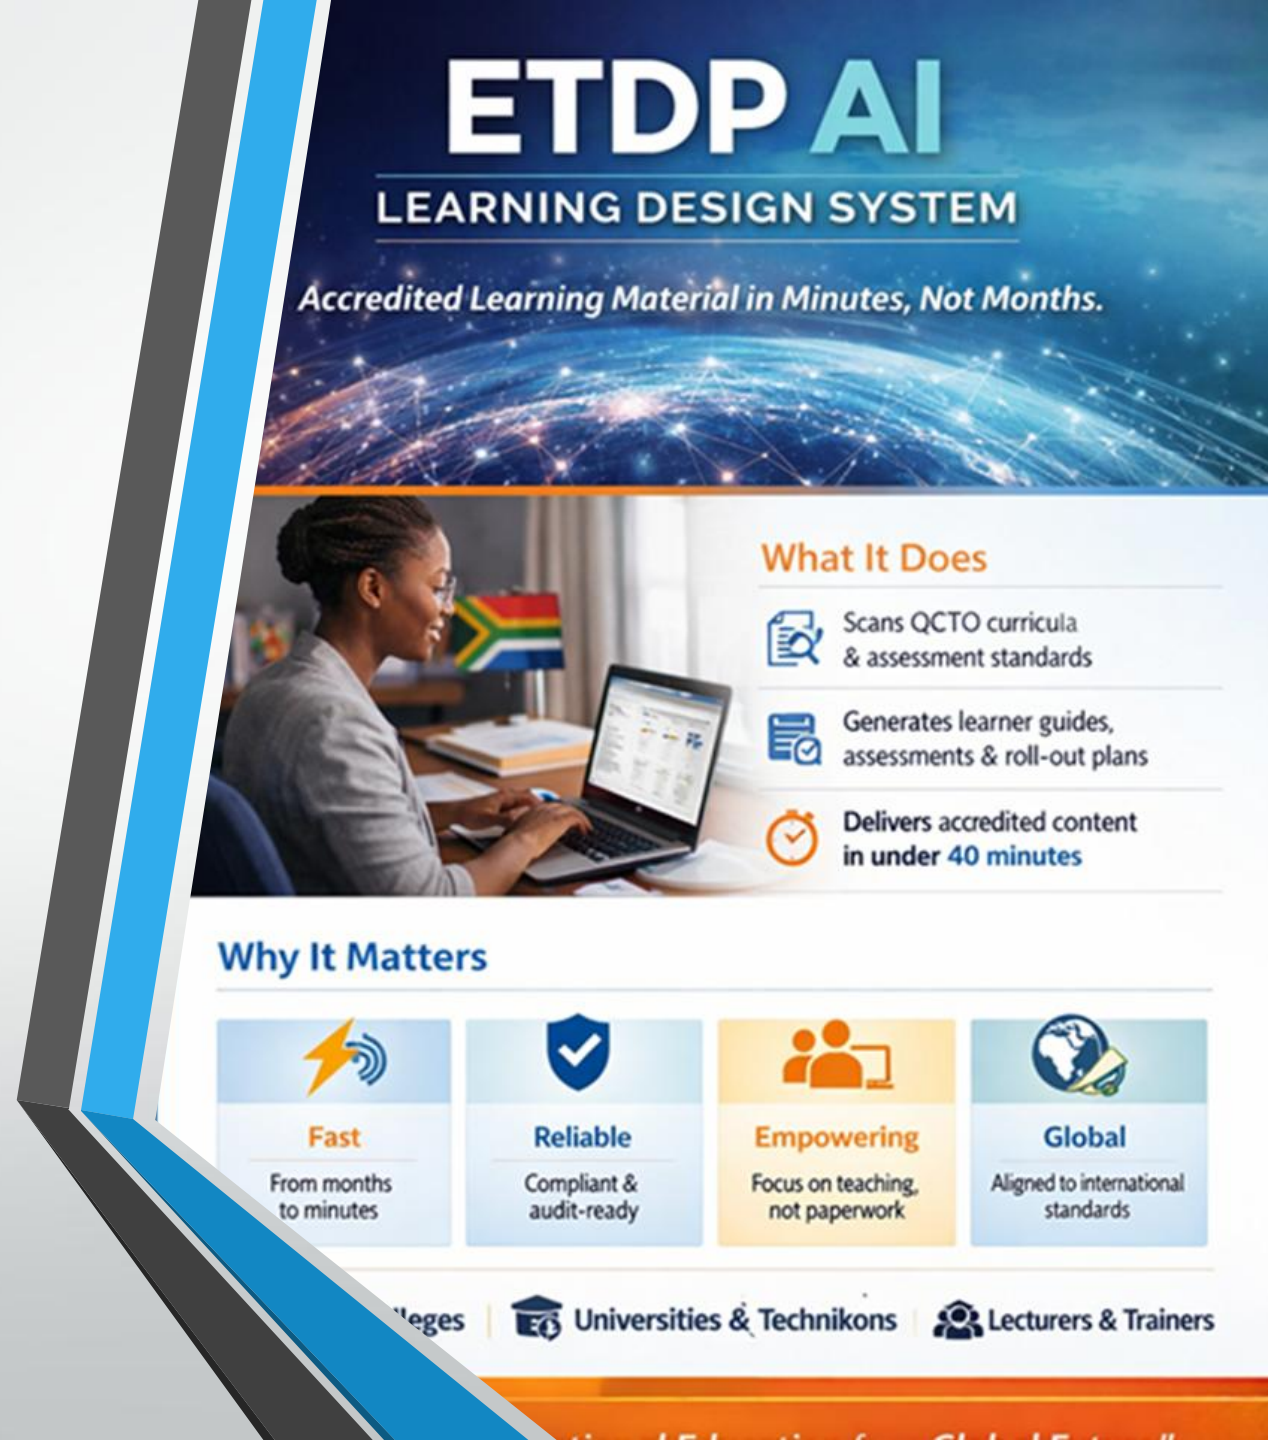

By scanning official QCTO curricula and assessment specifications, the system generates complete accredited learning resources — learner guides, assessments, roll-out plans, and more — **in under forty minutes.**

What once took months now takes minutes.

THE VISION

- The ETD **Artificial Intelligence** Learning Design System is more than technology — **it is a revolution in accredited learning design**.
- **Precision, integrity, and speed define this future**."
- **RSA AI Strategy**: "*This system is not only aligned with QCTO and SAQA standards — it* ***is aligned with the national AI vision****. It safeguards* ***South African data****, empowers educators,* ***and positions our institutions as leaders in Africa's AI-driven education transformation****."*

SOUTH AFRICAN GRIT

THE ETD ARTIFICIAL INTELLIGENCE LEARNING DESIGN SYSTEM IS NOT SIMPLY SOFTWARE; IT IS A REVOLUTION IN ACCREDITED LEARNING DESIGN.

IT TAKES WHAT ONCE DEMANDED MONTHS OF PREPARATION AND DELIVERS IT IN MINUTES, WITH INTEGRITY, COMPLIANCE, AND VISION.

THIS IS EDUCATION REIMAGINED — BUILT HERE, WITH NO SPONSORS NOR FUNDING, FOR OUR PEOPLE, AND READY FOR THE WORLD.” JUST PURE SOUTH AFRICAN GRIT!

ACCREDITED LEARNING RESOURCES

- By scanning official QCTO curricula and assessment specifications, the system generates complete accredited learning resources — learner guides, assessments, roll-out plans, and more — in under forty minutes.

THE "CHALLENGE"

"FOR DECADES, EDUCATORS HAVE FACED THE SAME OBSTACLES: MONTHS OF PREPARATION, INCONSISTENT MATERIAL, AND COMPLIANCE RISKS.

THE BURDEN WAS HEAVY, THE PROCESS FRAGMENTED, AND THE PACE TOO SLOW.

THIS IS THE PROBLEM WE SET OUT TO SOLVE."

WHAT IT DOES?

- From curriculum to classroom, the system delivers everything educators need: guides, assessments, workbooks, logbooks, and presentation slides.
- Each output is aligned to **standards**, **compliant**, and ready for use."

WHY IT MATTERS ?

- This is about **empowerment**.
- Educators can **focus on teaching**, not paperwork.
- Institutions gain **reliability and audit readiness**.
- Learners receive consistent, **high-quality material** that meets international benchmarks.
- **Fast. Reliable. Empowering. Global**.

Fast → Inclusive growth: Reliable → Ethical governance: Empowering → Human capital Development → Global → Sector specific competitiveness → Quality learning for all

Strategic Positioning

For the first time, South African institutions — TVET Colleges, Universities, and Technikons — can access standardized, locally developed learning material that competes globally **while remaining true to our national framework**.

This is South African innovation, resilient and world-class.

EDUCATION REIMAGINED

THE ETD AI LEARNING DESIGN SYSTEM IS MORE THAN A TOOL — IT IS A COMMITMENT TO THE FUTURE OF LEARNING.

EDUCATION REIMAGINED.

COMPLIANCE ASSURED.

EMPOWERMENT DELIVERED.

THIS IS NOT THE FUTURE COMING — IT IS THE FUTURE WE HAVE BUILT TOGETHER.

RISKS & OPPORTUNITIES

- **Opportunity**: I would sincerely wish to position ETD AI as a pilot project under the education sector roadmap of the AI Strategy.
- **Risk**: The RSA draft policy is still under consultation; and we understand that this is a living system open to risk and security challenges; but we are willing to grow it as a living example of policy in action.
- **Action**: We would welcome to collaborate with the Department of Communications and Digital Technologies, the DHET, QCTO, DBE, SAQA all Quality Councils on implementation and case studies.
- I have served for 8 years in the Cyberwarfare Regiment od the SANDF, worked on many SITA Projects, conducted the 2014 DOD IT Audit and are very familiar with the Government processes.

DATA SOVEREIGNTY

- **South African data must remain locally controlled.**
  - Our Your platform's local first AI design and independence from foreign dependencies this is exactly what the policy calls for.
- **Human Capital Development** .
  - Building AI literacy and skills across schools, TVET colleges, and universities.
  - Our system directly supports this by embedding accredited resources into vocational training

SECTOR SPECIFIC STRATEGIES

- Education is explicitly highlighted as a priority sector.
  - Our system is a ready made for sectoral implementation, showing how AI can transform curriculum delivery while maintaining compliance.
  - We are already far into the 2nd phase of developing and benchmarking curricula for SAQA Qualifications.

NATIONAL AI VISION

This system is not only aligned with QCTO and SAQA standards — it is aligned with the national AI vision.

It safeguards South African data, empowers educators, and positions our institutions as leaders in Africa's AI-driven education transformation.

ETD AI Learning Design System – Aligned with RSA AI Strategy (2026)

- **In Summary:**
  - **Inclusive Growth:** Accelerates workforce readiness by reducing curriculum preparation from months to minutes.
  - **Ethical Governance:** Ensures fairness, validity, and reliability in assessments.
  - **Data Sovereignty:** Built on local-first AI, independent of foreign dependencies.
  - **Human Capital:** Empowers educators, strengthens TVET and higher education.
  - **Education Sector Strategy:** A flagship example of AI transforming accredited learning in South Africa.

EVIDENCE OF DELIVERABLES

You will find all the deliverables as it was designed and produced on normal Windows PC under the "My Documents" folder when the AI ETDP App is launched.

We have attached only Chapters of the Learner Guide as the 671101000, Occupational Certificate: Qualification: Electrician, used as Pilot produces more than 150Mb of data which makes it impractical to email. We have also finalised the Diesel Mechanic and Fitter and Turner Learning Programmes. As part of our pilot tests.

Kindly Contact me at 071 153 3735, whatsapp, or email wepener.pcw@outlook.com and we can gladly set up a zoom or Teams Meeting.

EVIDENCE OF DELIVERABLES

- **The App is the product of 2 years and I would be delighted to hear from sponsors, partners, Investors or any person or company that would be interested to pursue this avenue further with me.**
- **Memorandums of understanding are available and will be discussed with you.**
- **The App is extremely affordable and future endeavours will fully depend on the DHET and QCTO.**

Thank You

Pierre Wepener
